## JOKE OF THE WEEK

How do you know when the moon is going broke?

When it's down to its last quarter

## SUMMER STEAM - SCIENCE

Summer has arrived and you might already be hearing "I'm bored" from the kids. We're excited to share some of our favorite STEAM activities with you that you can do together at home! STEAM stands for Science, Technology, Engineering, Art, and Mathematics. This week we'll be sharing a few fun science activities!

Learn how to grow your own salt crystals with a few basic materials and this tutorial from Babble Dabble Do:  
<https://babbledabbledo.com/science-for-kids-crystal-garden/>

This one could get a little messy! Oobleck is fun to both say and make. Check out STEAMsational's cornstarch quicksand experiment at:  
[www.steamsational.com/cornstarch-quick-sand-science-experiment](http://www.steamsational.com/cornstarch-quick-sand-science-experiment)

With just bread, sandwich bags, and a permanent marker, you've got all you need to conduct a study on mold growth!  
<https://www.steamsational.com/bread-mold-experiment/>

## COMING UP

Next week will feature technology! Share your science experiments with us at [facebook.com/smtxc](https://facebook.com/smtxc)
