JOKE OF THE WEEK

What do you call a computer superhero?

A screen saver!

SUMMER STEAM - TECHNOLOGY

This week's STEAM activities will feature Technology with a focus on coding! "Coding has been called 'the literacy of the 21st century' for good reason. Just like math, science, and literature, coding is a key aspect of understanding our technologically advanced world. There's a huge need for a generation that not only understands technology, but how it works."

(Code Ninjas - codeninjas.com/faq)

We love this simple and interactive activity from Left Brain Craft Brain! With no equipment required, this is fun for the entire family to participate in. leftbraincraftbrain.com/if-then-backyard-coding-game-for-kids/

Girls Who Code is an organization with a mission to educate and equip high school girls with confidence and computing skills. Check out their free resources and activities at girlswhocode.com/programs/code-at-home

COMING UP

Next week will feature engineering! Share what you've learned about coding with us at facebook.com/smtxc
