SUMMER STEAM - MATHEMATICS

This week, we're mad about math! According to Britannica Kids, "Mathematics, or math, is the study of numbers and how they are related to each other and to the real world. Math is as important as language. In fact, people sometimes describe math as a kind of language. Everyone uses math every day—to tell time, to play games, to cook, to build things, and to do almost any kind of work."

Teach Beside Me shares how fractions can be fun by baking your own fraction cookies!
teachbesideme.com/fraction-cookies/

We love this 2 for 1 math activity from Elmer's! Learn how to count coins and tell time by making a coin clock.
