

Discovery 2018 Camp

KEEP SAN MARCOS

BEAUTIFUL

WEEK

SITE SUPERVISOR CADY MULKEY 512.738.3285

Discovery campers this week learned about how recycling, composting, and reusing materials can help protect the beauty of the city we love. Our City of San Marcos Community Services department is very blessed to have a Community Enhancement and Resource Recovery team that is passionate about educating our future generations. This group of individuals came out and led educational activities for our campers and our Community Enhancement Initiatives Manager arranged for our campers to visit and have a tour of the Texas Disposal Systems landfill and facility.

JULY 9-13 • DUNBAR RECREATION CENTER • 7:30AM- 5:30PM

REDUCE. REUSE. RECYCLE.

DISCOVERY CENTER

At the Discovery Center last week campers were shown the facility's compost and taught how it works. They also made compostable flower pots and seed balls with wildflower seeds that can be planted this fall.

TX DISPOSAL SYSTEMS

Our Campers were able to tour the daily operations of the TDS: landfill, recycling, and composting areas. They were able to see where the items they place in their bins each week end up. Additionally, our campers were able to see a few of the over 100 exotic animal species they have on the property.

URBAN AIR

Lastly, our campers enjoyed having some fun after all their learning last week by jumping and playing on the play structures at the Urban Air, New Braunfels facility.
