

## Windows

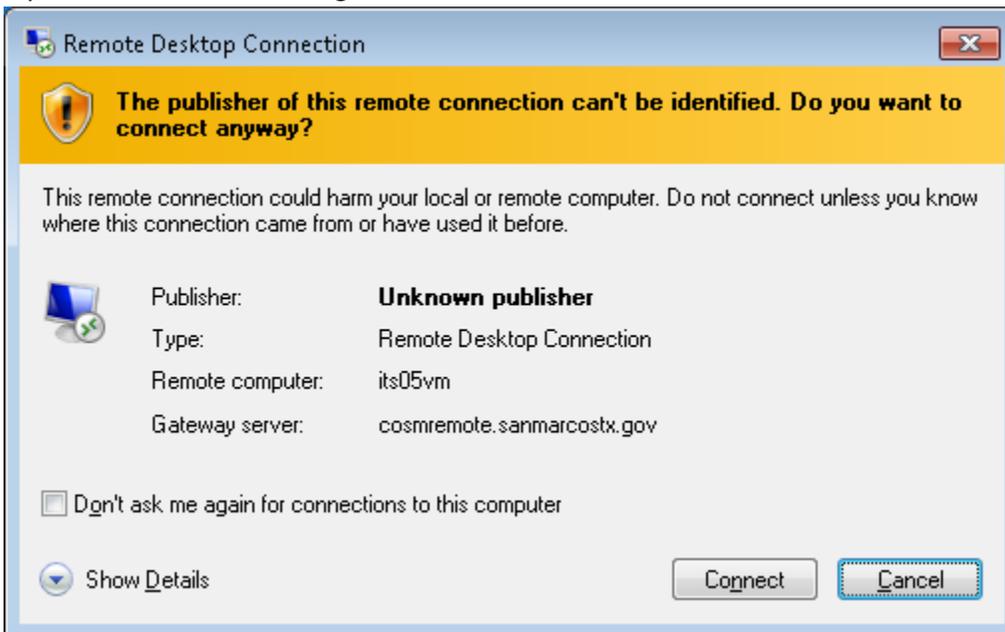

- 1) Double click on the “remote desktop settings file” that you downloaded

- 2) Type your work computer name into the “Computer:” field.

- 3) If you receive a trust warning, click “Connect”.

- 4) Enter your network user name and password as usual.

The image shows a Windows Security dialog box titled "Windows Security" with a close button in the top right corner. The main heading is "Enter your credentials". Below this, it states "These credentials will be used to connect to the following computers:" followed by a list: "1. cosmremote.sanmarcostx.gov (RD Gateway server)" and "2. ITS01VM (remote computer)". A horizontal line separates this text from the input fields. On the left is a small square icon representing a user profile. To its right are two text input fields: the top one is labeled "Lastname\_Firstname" and the bottom one is labeled "Password". Below the password field, the text "Domain: san\_marcos" is displayed. At the bottom left of the dialog, there is a checkbox labeled "Remember my credentials". At the bottom right, there are two buttons: "OK" and "Cancel".

- 5) Click OK
