

# Bobblehead Turtle Craft

## Supplies:

- 1 egg carton cup
- 1 pipe cleaner
- tissue paper
- 1 medium pompom
- 3 buttons or beads
- 2 google eyes
- tape, glue, marker
- scissors, ruler

1. Cut five 2 inch pieces off the pipe cleaner. (use your ruler) 😊 Bend four into a V shape. (these are the legs) Next, tear small pieces of tissue paper.

2. Glue the tissue paper pieces to the outside of the egg carton cup.

3. Tape the legs around the inside of the cup. (the flat sides are easier to tape)

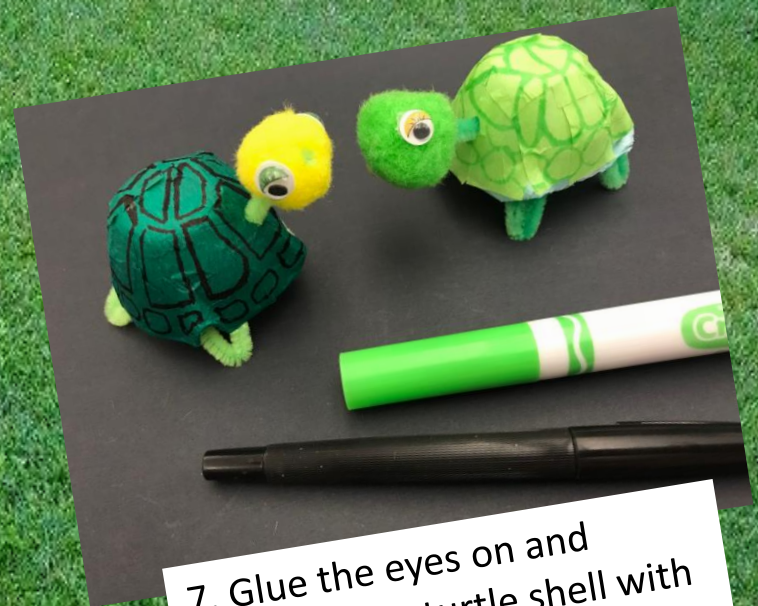

4. Poke a hole with a pencil in the spot you would like the head and neck to be. Make the hole fairly big. Next, thread the buttons or beads on one end of the pipe cleaner. This will be the weight so the head will bounce.

5. Thread the pipe cleaner through the hole from the inside of the egg cup.

6. While holding on to the pipe cleaner push the end into the pom-pom until it is all the way through. Bend the tip of the pipe cleaner then pull the pom-pom up to the end. You will see a little pipe cleaner dot on the pom-pom. The turtle's mouth. 😊

7. Glue the eyes on and decorate the turtle shell with your marker. Touch the head and see it bounce back.  
**Ha Ha Ha!**
